

## **DOUUOD WOMAN SS19**

Sports and nature, technical fibers and natural fibers, sportswear and dailywear. In SS19 Douuod Woman collection we have tried to mix these two concepts and lifestyles in order to create garments that combine comfort and the practicality of sport with the purity and simplicity of nature.

Technical materials like the cotton / polyester sweatshirt, the striped rib in cotton/ lycra, the polyester crepe, the knitwear yarn in polypropylene and the polyamide / lycra extra life taken directly from the world of sportswear are combined with natural materials such as linen, cotton / hemp, jute / hemp, silk, viscose and pure cotton.

The Douuod woman will wear a city-style jute caban and a technical lycra legging to go shopping at her trusted organic supermarket, or her long skirt in spotted silk twill and the technical double-sided logo sweatshirt for an aperitif in the city center with friends ... and why not ... the long mermaid backless dress in polyester crepe for the first night at the theater ...

The Douuod Woman identifies herself as an active, engaged, sporty woman ... underground ... simple but always extremely refined.
