**Sustainable handmade  
unique piece woven  
on the loom of history**

COLLECTION 2020

## INSPIRATION

**OVERLORD** is the movie we dream of, the one that mixes John Ford's aviators, Kurosawa's samurai and Morricone's cowboys in a fantasy epic.

**OVERLORD** was born from a desire to reinvent clothing taking its inspiration from the Japanese, American and European streetwear trends.

**OVERLORD** purpose is to capture our definition of vintage, using fabrics that have been worn, ragged, used by soldiers, labourers, farmers, carpenters...

**Our obsession is to stay true to the character of each piece of garment. We use our creativity to create timeless and affordable upcycled pieces. All of our clothing is carefully crafted and built into style, keeping in mind the original garment and its characteristics during the upcycled production line.**

## **~~TEXTILE WASTE~~**

We are aware that the textile industry is the second most polluting after petrochemicals. Every year, millions of tons of clothing are discarded and incinerated while 85% could be recycled.

We believe that there are alternatives to this linear system (production, use, destruction) that causes enormous damage to the environment and climate. Our vision is to offer a solution to consumers looking for trendy clothes and wanting to make a positive impact on the planet.

## **~~PREDICTIVE TRENDS~~**

We deplore the influence of “fast fashion” on the “Fashion” planet. Never has the style been so standardized. The same clothes are sold in the same stores around the world. Even when we travel, it is more and more difficult to find original clothes. To be dressed with designer clothes or haute couture is expensive and often beyond our means. And still... These pieces can be worn by other people.

At Overlord, we think differently. Because each person is unique, they must be able to afford quality, personalized clothing, without ruining their budget or devastating the planet. That’s why we defend a model that contributes to an overall solution to waste and standardization.

## AUTHENTIC CLOTHES

Our selection process allows us to be the most authentic possible. We source our garments like real gold from huge secondhand warehouses. Our fabrics come from clothing that has been used, often from American, French, German and Italian production lines and military clothing. Our sourcing is done in both Thailand and France.

We work with the largest warehouses which allows us to have the widest choice in terms of quality material and availability. Our primary concern is to select each piece of vintage based on its quality and characteristics. In France, we work with Eureka Fripe, a fashion designer passionate about vintage and pioneer in giving clothes a second life.

8

## UPCYCLING

Our model is “upcycling” : a process where vintage materials and clothing are converted into original and better quality pieces manufactured in small series. Upcycling involves using and assembling either vintage or leftover pieces to produce new patched fabrics with greater environmental value.

Like Japanese workers who used to mend their clothes (sashiko), our fabrics are carefully reused to be transformed into new creative and trendy clothes whilst making a step further towards achieving zero waste. Our Rework lines (new and previous collections) are entirely made with new and eco-friendly garments.

COLLECTION 2020

## PRODUCTION

Our FULL VINTAGE collection is made in Thailand in garment workshops that facilitate the insertion of people with disabilities. Through the Universal Foundation for Persons with Disability (UFPD) chaired by Khun Prayat, OVERLORD is able to partner with an association that has a strong local history with garment workshops.

This association allows us to make sure that our production is responsibly-run and that workers with disabilities are given the opportunity to access the employment market. Our Rework jacket line is produced in France.

11

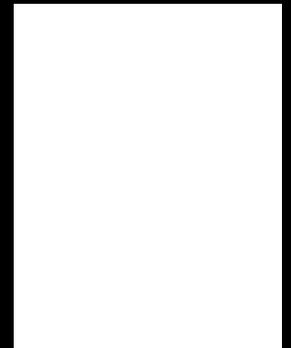

## OUR STORY

**OVERLORD** was created by Cédric Chauveau in 2017. Cédric began customizing luggage and designing sneakers. His passion for design and desire to combine his interest with vintage products and travel led him to create this new eco-friendly brand with Tansen Bel, a brand designer.

**OVERLORD** aims to further expand, meeting the desire of consumers for authenticity and originality while making a positive contribution to the planet. As of today, OVERLORD is being distributed in famous department stores like PRINTEMPS and RINASCENTE. Our brand is also available in some concept stores like JINJI, BATTAGLIA and KILIWATCH.
